PROFESSIONAL SUMMARY

Full-stack Software Engineer with 2.5+ years of experience building and shipping production systems with ASP.NET Core, Angular and PostgreSQL. Delivered transport-domain platforms end to end, including online ticket booking, real-time GPS vehicle tracking, ONDC (TRV12) mobility APIs, third-party integrations, monitoring and SLA automation. Also experienced in workflow automation (n8n) and Solidity smart contract development with Hardhat and ethers.js.

PROFESSIONAL EXPERIENCE

trackNOW Pvt. Ltd. | Software Engineer | Jul 2026 – Present

- **Fleet Management & Telematics Platform**: Building features for a GPS-based fleet tracking SaaS platform serving logistics, school-bus and enterprise fleets, using ASP.NET Core Web APIs, Angular and PostgreSQL.
- **End-to-End Ownership**: Own modules from scratch across requirement analysis, database design, API and UI development, and deployment/publishing to production.
- **Real-Time Tracking Features**: Develop backend and UI for live vehicle tracking, trip history, geo-fencing and fleet reports, processing high-frequency GPS device data.

Amnex Infotechnologies Pvt. Ltd. | Associate Software Developer | Feb 2024 – Jul 2026

- **Online Passenger Reservation System (OPRS)**: Developed and maintained a scalable ticket booking system for state transport operations; built RESTful APIs in ASP.NET Core and Angular UI for route management, booking workflows, seat layouts and transaction handling.
- **OBU Panel**: Engineered a control panel that parses GPS device data strings for live bus tracking and diagnostics, visualizing real-time location, speed, ignition status and route adherence on map interfaces.
- **ONDC Integration**: Designed and integrated ONDC-compliant mobility APIs on the TRV12 protocol, supporting runtime vendor contract changes, version resilience, payload validation and seat layout mapping.
- **Third-Party Integrations**: Built OPRS integrations with external platforms for reliable data exchange, improving automation and system interoperability.
- **WhatsApp Chatbot (n8n)**: Built a WhatsApp chatbot in n8n integrating PostgreSQL, Rasa, Gemini, Rocket.Chat and the WhatsApp API for complaint registration, AI/human chat support and real-time ticket tracking.
- **Environmental Monitoring System (EMS)**: Configured a centralized Grafana dashboard for server and container resource utilization, with alerts and automated logs to identify issues proactively.
- **SLA Automation**: Automated SLA penalty report generation from API uptime/downtime, incident logs and scheduled downtimes, improving reporting speed and compliance accuracy.

Gigapher | Blockchain Developer Intern | Jul 2022 – Jul 2023

- Developed and deployed Solidity smart contracts, including an ETH transfer project, on Ethereum testnets.
- Tested and deployed contracts with Hardhat and Truffle; followed EIP/ERC standards for contract compliance.
- Integrated smart contracts with a React front end using Web3.js and ethers.js to build working dApps.

SKILLS

- **Languages**: C#, JavaScript, TypeScript, SQL, Solidity, Python (basic)
- **Frameworks & Libraries**: ASP.NET Core, ASP.NET MVC, Web API, Angular, AngularJS, React, Entity Framework, LINQ, ADO.NET
- **Databases**: PostgreSQL, Microsoft SQL Server, MongoDB
- **APIs & Integration**: REST APIs, ONDC, WhatsApp API, JWT Authentication, WCF (basic)
- **DevOps & Tools**: Git, GitHub, GitLab, Docker, CI/CD, Grafana, n8n
- **Blockchain**: Solidity, Hardhat, Truffle, ethers.js, Web3.js, ERC standards
- **Concepts**: OOP, Design Patterns, Dependency Injection, Agile

EDUCATION

- **Bachelor of Engineering** | LJ Institute of Engineering & Technology | CGPA: 8.04
- **Diploma in Computer Engineering** | Government Polytechnic, Jamnagar | CGPA: 8.82
